

Christopher Taylor Partner

Chris represents state, municipal and public agency clients in structuring procurements and drafting and negotiating contracts for the design, construction, operation, management and financing of public infrastructure projects. Chris's practice is focused on the implementation of public infrastructure on alternative project delivery and public-private partnership bases (including design-build, design-build-operate and design-build-finance-operate) in the water and wastewater treatment, social infrastructure, solid waste, transportation, and power and renewable energy sectors.
